DETAILED ACTION

1. This action is in reply to applicant's correspondence of 12 December 2006.
2. Claims 1-44 are pending for examination.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-41 drawn to a *security monitoring [i.e., analysis and validation] in an industrial automation environment*, classified in class **726**, subclass **25, 22**.
 - II. Claims 42-44 drawn to a *database oriented schema [as applied to factory automation security]*, classified in class **707**, subclass **100**.

4. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, and Group II, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention Group I has separate utility such as a *security monitoring [i.e., analysis and validation] in an industrial automation environment* which **can be used with** a *database oriented schema [as applied to factory automation security]*.

Invention Group II has separate utility such as a *database oriented schema [as applied to factory automation security]* which **can be used with** a *security monitoring [i.e., analysis and validation] in an industrial automation environment*. See MPEP § 806.05(d).

Art Unit: 2136

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
